EDUCATION

G.L Bajaj Institute of Technology and Management, AKTU
Bachelor of Technology in Computer Science ; GPA: 8.09
SARLA INTERNATIONAL ACADEMY BASTI, CBSE
XII Aggregate : 73% (Year 2023)
X Aggregate : 88% (Year 2021)

Greater Noida, India
Oct 2023 - Present
Basti , India
AUGUST 2003 - March 2023

SKILLS SUMMARY

- Languages:** C, C++, Python, HTML/CSS, ReactJS, Javascript
- Tools and Technologies:** Git, GitHub, Docker
- Frameworks:** Next.js, React Router, React Native, Tailwind CSS, ExpressJS
- Platforms:** PyCharm, Visual Studio Code
- Other:** Data Structures, REST API

WORK EXPERIENCE

Accenture – Introduction to Technology Apprenticeship (Virtual Experience)

June 2025 - July 2025

- Completed Accenture’s Introduction to Technology Apprenticeship, transitioning to cloud-based data platforms, enabling real-time insights and reducing processing by 4 hours weekly; outcomes resolved major operational inefficiencies
- Collaborated with engineering, product, and analytics teams during the virtual internship to optimize technical workflows, improving data pipelines and securing measurable efficiency gains of 20% in project outcomes
- Designed and deployed scalable Python programs across the apprenticeship simulation, automating data preparation and validation, cutting manual tasks by 30% while accelerating critical project execution timelines.
- Executed and optimized machine learning applications within the training program, driving a 25% gain in accuracy and producing impactful, business-ready insights for actionable decisions.

Deloitte – Technology Job Simulation Certificate

Jun 2025 - July 2025

- Completed Deloitte’s Technology Virtual Simulation, applying web development frameworks to improve project efficiency and technical productivity.
- Collaborated with diverse functional teams to outline simulation requirements and deliver solutions, driving a 20% improvement in task effectiveness.
- Built and maintained scalable application structures with React.js and JavaScript practices, enhancing execution speed and project efficiency by 30%.
- Developed backend integrations and optimized database operations during the program, reducing delays by 25% and improving overall user experiences.

PROJECTS

AI Career Accelerator & Resume Skill Gap Analyzer Website

July 2025

- Developed an AI-powered Resume Analyzer web application using Python, NLP, scikit-learn, and Streamlit for interactive UI.
- Implemented automated parsing and structured visualization of resumes to extract education, skills, and work experience. Built machine learning models to evaluate keyword relevance, career alignment, and job-fit scoring with high accuracy.
- Designed a clean, responsive interface with dynamic dashboards, scorecards, and career recommendation insights. Integrated interactive components including real-time ATS score generation and Google ATS-based shortlisting prediction.
- Followed modular coding practices ensuring scalability, maintainability, and optimized performance for large datasets

Stockseer.ai website

July 2025

- Developed StockSeer.AI, a stock market prediction platform using Python (backend) and Streamlit (frontend), allowing users to analyze and forecast stock trends in real time.
- Integrated scikit-learn and TensorFlow models for price prediction and trend analysis, delivering actionable investment insights.
- Implemented a data-driven system where users can search, filter, and visualize historical as well as live market data dynamically.
- Designed a responsive and intuitive dashboard UI with interactive charts, ensuring accessibility across desktop and mobile devices
- Ensured seamless prediction updates through API-driven architecture and asynchronous event handling for smooth user experience
- Employed modular pipelines for data preprocessing, feature extraction, and ML model deployment, ensuring maintainability

CERTIFICATES

Learning Python (Infosys SpringBoard)

November 2024

- Completed a comprehensive Python programming course covering core concepts such as data structures, object-oriented programming, and file handling.
- Gained hands-on experience in writing clean, efficient Python code and building small-scale applications, laying a strong foundation for backend and data-focused development.
